

## Every morning 118,427 people use this 10-Second Morning Ritual To Naturally Lower Blood Pressure

## Scientists At Harvard University Uncover **The Real Root Cause Behind High Blood Pressure** And It Will Shock You...

What if I told you that everything you know about hypertension, and how to prevent it is all a lie and that there is a simple technique to naturally lower your blood pressure within minutes?

A secret that has been hidden from you by big Pharma, the mainstream medical community and even your local doctor...

Which you'll soon discover has nothing at all to do with changing your diet, lowering your salt intake, exercising more, or taking another dangerous prescription drug.

Unearthed by a team of research scientists halfway around the world studying an ancient Japanese mountain village, **a village renowned in the medical community for having the healthiest and oldest living people on the planet.**

An **all-natural 10-second morning ritual** so simple you can do it right now sitting at your kitchen table and so powerful it will easily pry open stiffly closed blood vessels and lower blood pressure within minutes.

But first, you need to understand why it works.

In 2022 a secret groundbreaking study was done by the Mayo Clinic that observed a group of 450,000 men and women, the largest ever of its kind, all ranging from 35 to 85 years of age, coming from all different backgrounds and lifestyles, those suffering from prehypertension and to those severely hypersensitive and taking several daily blood pressure medications.

The only difference between those who suffered from high blood pressure compared to those who didn't came down to one singular thing. **A newly discovered stress hormone known as PLR-15.**

Scientists found that this stress hormone, or PLR-15 **was 400% more active and present** in the people with high blood pressure compared to the participants with healthy levels.

The medical community categorizes this hormone or PLR-15 as one of six stress hormones we have in our bodies like Adrenaline or Cortisol but is likely one you've never heard about because until now, has never been an issue but, because of the society in which we live in today, filled with everyday little modern-day stressors like raising a family, paying bills, being stuck in traffic, and more.

This hormone is skyrocketing in the population so much so, with 24/7 around the clock **bad news coverage** and **overstimulation from cell phones and computers**, we are even seeing a **record number of young folks being diagnosed with high blood pressure**.

You see, your body can't tell the difference between fighting for your life or fighting for a parking space. It just sees it as stress, so when released around the clock, what this hormone does is turn your once flexible tube-like arteries into hard callused stone, which increases your blood pressure while forming deep cuts along the inside lining of your entire network of vessels and the only way to patch up these holes is with sticky cholesterol.

**So over time, if nothing's done, your vessels will continue to harden because of this stress hormone, your blood pressure will continue to rise, and more damage will be done until there's a complete blockage.**

**Not only damaging your heart, but this silent killer is also clogging the filtration process in your kidneys, erasing your most precious thoughts, and causing your eyesight to decay.**

Scientists have now proven and the evidence is overwhelming that there's an obvious direct relationship between this everyday stress we've come to get used to, the overabundance of PLR-15 in your blood, the hardening of your arteries and high blood pressure.

**Everyday more and more people are dying from hypertension related illnesses and that number only continues to skyrocket.** Despite new blood pressure medication and new diets being marketed as **CLICK HERE TO BUY** every single 

day.

 Laboratory.

There has been no way to naturally lower blood pressure indefinitely and to fight back against the rise in PLR-15 levels.

Until now...

### **Robert Was Able To Stop Taking His BP Meds...**

*"I was diagnosed with high blood pressure over 10 years ago, knowing full well that I'd be placed on medication for the rest of my life and I just accepted it. Then I came across this and I figured, why not? I'll give it a shot. Well, now my blood pressure readings are in the 120s over 70 and I've been able to stop taking all of my hypertension meds, my doctor still can't believe it."*

**Robert Silas** from Arizona

### **Debbie Can Play With Her Grandchildren Again...**

*"My doctor put me on high blood pressure medication and I just couldn't take the side effects. They made me tired and fatigued most days of the week and I didn't have the energy to keep up anymore. My sister told me to try this and now, not only is my blood pressure down but I have so much more energy and stamina. I can finally play hide and go seek with my grandchildren again without having to quit."*

**Debbie Reynolds** from Mississippi

### **Jerome Lowered His BP By 21 Points**

*"Both my wife and I have hypertension. We take a lot of vitamins, but never anything natural for our high blood pressure. In fact, we didn't know something like this even existed and I'm personally glad*

*stumbled upon this video and solution. My wife knocked her numbers down by 15 points and I've dropped mine by 21 points, and we can feel it too. We have more energy, more stamina, and much-improved circulation, thank you John!"*
