## Models: ZKD-A4025,ZKD-A5055, ZKD-A6090, Digital Drying Vacuum Ovens

The Vacuum Drying Oven well combines vacuum condition with drying heating technique, significantly reduces boiling point & vapor tension, in order to provide the experiments a dustless, nonvortex, gentle working room. Therefore, it will be convenient to collect, discharge & reuse the vapor. Moreover, because the whole procedure of experiment, like storage, heating, drying, all processes in the vacuum or inert gas chamber, the specimen won't be oxygenated readily.

Automatic poweron and poweroff, timing operation, clock indicating, power-off recovery, parameter recalling & encryption, temperature indicating and correcting. Monitoring timer, independent exceeding guard, & independent protector for electric leakage & over current. Option: Individualized 10 segments, 18-step preset programs achieve temperature preset timing programs or reciprocating, stepped, ladderlike temperature running.

- Self-diagnosed techniques, such as power cut alarm, sensor failure alarm, and upper and lower temperature limit exceeding alarm.
- Highly responsive thermal sensor and environmental scanning microprocessor chip.
- Vacuum electromagnetic valve makes it easy to switch the vacuum pump.
- Built-in large-scale plate heating design ensures the fine uniformity of temperature in the chamber.
- LED clearly indicates the set parameters and real parameters.
- Mirror stainless steel chamber, electro polished stainless steel shelves and toughened glass observe window indoor.
- The luxurious and elegant profile with aesthetic designing.
